DECADES OF EXPERTISE, PROVEN RELIABILITY

Our History

CORPORATE DEVELOPMENT SINCE 1963

Our Locations

GERMANY, ITALY, UNITED KINGDOM, CZECH REPUBLIC

Our Value Proposition

YOUR BENEFITS AT A GLANCE

Optimally timed material flow, improved occupational safety and a reduction in operating costs: with our AGVs, you can achieve sustainable efficiency and contribute to securing your location in the long term.

AGV & AMR Portfolio

VARIO MOVE

Safe load transfer at heights of up to 5.25 m

Maintenance free LI-Ion battery system for 24/7 use

Hybrid navigation, suitable for all areas of application

Low operating costs thanks to extended service intervals and reduced service times

High flexibility thanks to modular vehicle concept

Driving speed up to 2 m/s

Rapid amortization due to low process costs

High load capacity of up to 1,600 kg

Sustainable due to longer life cycle (compared to series vehicles)

Maximum availability and uncompromising quality standards

VARIO MOVE CT

VARIO MOVE CTO

red dot winner 2022

X MOVE

Rigid chassis design

Maintenance free LI-Ion battery system for 24/7 use

Hybrid navigation via contour and / or reflectors

Low operating costs thanks to extended service intervals

High flexibility thanks to modular design

Driving speed up to 1.7 m/s

Rapid amortization due to low process costs

Load capacity 600 or 1,200 kg

Sustainable thanks to long life cycle

Maximum availability and uncompromising quality standards

Simulation & Pointcloud

OPTIMAL PLANNING & DIMENSIONING OF COMPLEX INTRALOGISTICS SYSTEMS

SIMULATION

With our material flow simulation, we make the potential for process optimization visible for our customers, find customized solutions and implement them in reality.

[OVERVIEW SIMULATION](#)

POINTCLOUD

Using the 3D Point Cloud, we create an exact replica of your factory environment to optimize processes, determine the best intralogistics solution, and present it quickly and clearly.
